

Bring Invisible Audio To Suspended Ceilings

The Revolution Acoustics Ubiqui-T360™ brings the power and constant-SPL performance of the SSP6 Multiducer™ to drop ceilings. This ceiling tile adaptor panel attaches to an existing ceiling tile for a completely invisible audio installation, with comprehensive audio coverage. It's ideal for sound masking, background music, classroom audio and paging applications.

Convenient

Attaches directly to any ceiling tile 2' x 2' (60.96 cm x 60.69 cm) or larger without any tools – there's no need to cut holes or install bulky mounting equipment above ceiling tiles.

Fast installation

Install an SSP6 Multiducer onto a ceiling tile in under two minutes.

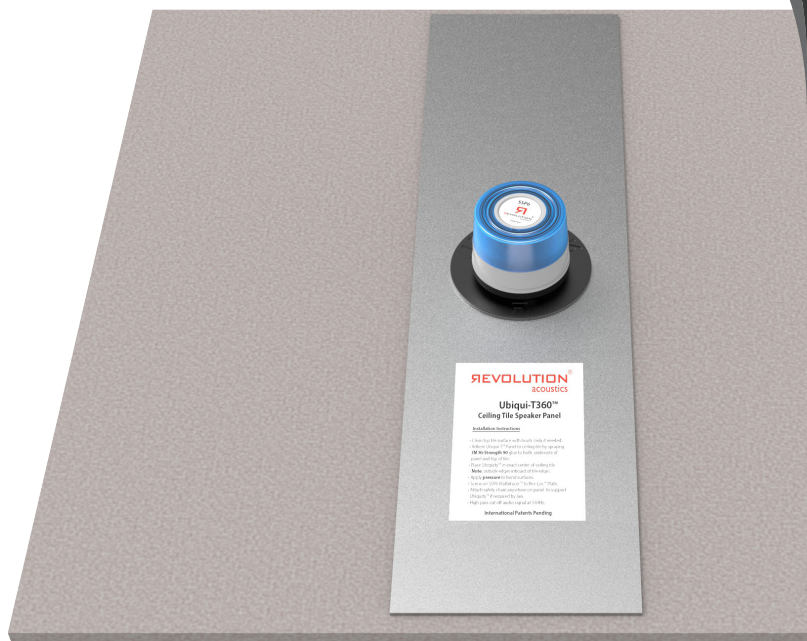

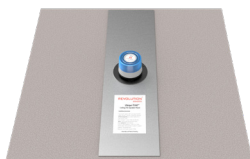

Powerful

One Ubiqui-T360 panel with SSP6 will provide uniform audio coverage for up to 1,000 square feet or 100 square meters of space, with no hot spots or dropout zones.

Completely invisible

An installed Ubiqui-T360/SSP6 speaker looks *exactly* like your other ceiling tiles – because it's installed on the upper side of one of your existing ceiling tiles using 3M Hi-Strength 90 spray adhesive or equivalent.

	Ubiqui-T360™
Product Type	Ceiling Tile Adaptor Panel* for SSP6
Frequency Response	100-150Hz - 20KHz
Max Power	200W (instantaneous peak)
Max Continuous Power	24W unenclosed, 15W enclosed
Regulatory	UL 2043 listed (full system)
Dimensions	23.25" D x 6.00" W (588.0mm H x 152.0mm W)
Weight	0.66 lbs (0.30 kg)

*Patent Pending
